

Heat Pump Water Heater (HPWH) Installation Form

Unitary HPWHs combine the tank and compressor in a single unit. Split-system HPWHs have interior storage tanks and outdoor compressors installed outside the building.

All sections of this form must be filled out. A copy of this completed form and the purchase receipt or invoice must be promptly submitted to Okanogan PUD – Energy Services Dept.

HPWHs must be listed on BPA's HPWH Qualified Products List and installed according to manufacturer's specifications. A maximum of one HPWH measure may be claimed per account.
