### **Report of Independent Auditors**

To the Commissioners Public Utility District No. 1 of Okanogan County, Washington

#### **Report on the Financial Statements**

We have audited the accompanying financial statements of Public Utility District No. 1 of Okanogan County, Washington (the District), which comprise the statements of net position as of December 31, 2017 and 2016, and the related statements of revenues, expenses, and changes in net position and cash flows for the years then ended, and the related notes to the financial statements.

#### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America, and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

#### Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the District as of December 31, 2017 and 2016, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

#### **Other Matters**

#### Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the accompanying management's discussion and analysis, schedule of proportionate share of the net pension liability, and schedule of employer contributions be presented to supplement the financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

#### Supplemental Information

The unaudited supplemental information presented has not been subjected to the auditing procedures applied in the audit of the financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

#### Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated May 25, 2018, on our consideration of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the District's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the District's internal control over financial reporting and compliance.

Moss adams HP

Everett, Washington May 25, 2018

The following discussion and analysis is designed to assist the reader in focusing on the significant financial issues, provide an overview of Public Utility District No. 1 of Okanogan County's (the District's) financial activity, and identify changes in the District's financial position during 2017 and 2016. Please consider the information presented here in conjunction with the financial statements as a whole, including the footnotes and other supplementary information that is provided.

The District, a municipal corporation of the state of Washington, was established in 1936 and began operations in 1945. The District is governed by a three-member board of commissioners locally elected to six-year terms. The District operates both electric and telecommunications systems that are accounted for in a single proprietary fund.

#### **Overview of the Financial Statements**

The financial statements include the management's discussion and analysis and financial statements with accompanying notes. In accordance with standards issued by the Governmental Accounting Standards Board (GASB), the District's financial statements are presented on an accrual basis of accounting, which recognizes revenues when earned and expenses when incurred, regardless of when cash is received or paid.

The basic financial statements are presented as of and for the years ended December 31, 2017 and 2016, and consist of:

**Statements of net position** – The statements of net position present information on the District's assets, deferred outflows of resources, liabilities, deferred inflows of resources, and net position at year-end. These statements also provide information about the nature and amounts of investments in resources (assets) and the District's obligations to its creditors (liabilities).

**Statements of revenues, expenses, and changes in net position** – The statements of revenues, expenses, and changes in net position account for the year's revenue and expense transactions. These statements measure the District's operations over the past year and may be used to determine whether the District has been successful in recovering its costs through rates and other charges.

**Statements of cash flows** – The statements of cash flows provide information on the District's cash receipts and disbursements during the year. The statements report changes in cash resulting from operations, investing, and capital and related financing activities.

The notes to the financial statements provide additional information that is an integral part of the financial statements. This information includes the disclosure of significant accounting policies, financial activities, risks, commitments, and obligations.

#### **Financial Highlights**

During 2017, the District's overall financial position remained strong due in part to an increase in retail load of 3.7%. The increase in retail sales was driven by increased general service load as well as milder temperatures during 2016. The District did benefit from a 2.0% retail rate increase that went into effect on September 1, 2017. Although wholesale energy sales increased, the price was even lower than those in 2016 and, as a result, the District's wholesale revenues were off 12.5%. The District's net position increased \$7,538,225 compared with an increase in net position in 2016 of \$9,538,431.

The following is an analysis of key financial factors with an emphasis on changes between 2017 and 2016:

**Cash and investments** – The District had cash and investments totaling \$24,936,189, \$24,106,261, and \$25,862,415 as of December 31, 2017, 2016, and 2015, respectively. The increase of \$829,928 in 2017 partially resulted from declining capital outlay as the construction of a 27-mile transmission line neared completion. As noted in Note 1 to the financial statements, investments in the amount of \$10,962,461 are considered restricted as of December 31, 2017. The funds are restricted as follows: \$282,961 for debt service payments, \$1,944,500 for bond reserve requirements, \$2,600,000 for customer deposits and compensated absences, and the remaining \$6,135,000 is restricted in a rate stabilization fund.

**Utility plant** – Net utility plant increased by \$3,887,952, or 3.2%, during 2017, compared with an increase of \$7,371,533, or 6.4%, during 2016. A summary of utility plant in service is included in Note 3 to the financial statements.

**Long-term debt** – As of December 31, 2017, the District had \$29,522,805 in revenue bonds outstanding, compared with \$31,389,354 as of December 31, 2016. During 2017, the District did not issue additional revenue bonds. The decrease in revenue bonds outstanding was a result of scheduled debt payments made during 2017.

In addition, in 2010, the District authorized a not-to-exceed \$3,667,855 loan with the United States Department of Agriculture (USDA) for broadband improvements (the RUS Note) related to the American Recovery and Reinvestment Act (ARRA) award. As of December 31, 2017, the RUS Note had a balance outstanding in the amount of \$2,979,984.

During 2017, the District replaced its \$10,000,000 line of credit with a new line of credit in the aggregate principal amount not to exceed \$20,000,000, to cover operating costs and capital outlays as the need arises. As of December 31, 2017, the entire \$20,000,000 is available to the District if needed.

**Net operating revenues (expenses)** – The District recorded revenues from operations of \$53,529,410, which were \$6,073,364 more than operating expenses of \$47,456,046 in 2017, in comparison with 2016, when operating revenues exceeded operating expenses by \$5,226,915. In 2015, operating revenues exceeded operating expenses by \$3,231,534.

#### **Financial Highlights (continued)**

**Operating revenue** – Revenues from the retail sale of electricity increased by 3.3%, from \$45,153,587 in 2016 to \$46,625,103 in 2017, compared with an increase in retail sales in 2016 of 2.9%. This increase was anticipated during 2017 due to an increase in retail energy rates of 2.0% on September 1, 2017. In addition, retail revenue also increased due to a 3.7% increase in electrical load.

During 2017, revenue from wholesale sales of electricity decreased 12.5%, from \$2,451,474 to \$2,145,929. The decrease in revenue from wholesale sales of electricity was due to lower market prices in 2017 than 2016. In 2016, wholesale electricity decreased 23.2% from \$3,189,997 in 2015 to \$2,451,474.

In 2017, wholesale telecommunications revenue growth of 9.2% pushed revenue to \$2,928,695, compared with \$2,682,434 in 2016 and \$2,609,109 in 2015.

**Operating expenses** – Operating expenses increased by \$885,038, or 1.9%, from \$46,571,008 in 2016 to \$47,456,046 in 2017 in comparison to a decrease in operating expenses during 2016 of 2.7%. The 2017 increase in operating expenses is due to general increases in the consumer price index while the 2016 decrease is due to the pension expense related to the implementation of GASB 68 in 2015.

**Rates** – During 2017, the District updated its equity management plan, resulting in the District increasing retail energy rates by 2% on September 1, 2017. The District also passes through increases in contracted power costs to its customers using a cost of power adjustment (COPA). The COPA was increased on December 1, 2017, from  $0.56 \epsilon/kWh$  to  $0.66 \epsilon/kWh$ , but was then subsequently decreased to the current rate of  $.54 \epsilon/kWh$  on February 1, 2018.

#### Significant Capital Assets and Long-Term Debt

The District anticipates issuing new debt in the future to finance projects as discussed in the following paragraphs:

In the spring of 2016, the District broke ground on a project to construct an approximately 27-mile transmission line to serve the Methow Valley. The project had been held up while the District obtained a right-of-way across land owned by the state of Washington. Completion of the project is scheduled during the summer of 2018. The District has funded construction costs to date through rates and reserves, and does not expect to issue additional bonds for the completion of the project.

The District continues to invest in wholesale telecommunications infrastructure. As of December 31, 2017, the District has invested a total of \$15,516,615 in wholesale telecommunications plant in service, which is an increase of \$235,668 over year-end 2016. The District's telecommunications network is connected to the Northwest Open Access Network, a fiber optic system that is member owned. The network is currently utilized by 8 retail service providers, supporting over 2,500 end-user customers.

#### Significant Capital Assets and Long-Term Debt (continued)

The District is the current owner of the Enloe Hydroelectric Dam, a small non-operating hydroelectric project on the Similkameen River near Oroville, Washington. On July 9, 2013, the Federal Energy Regulatory Commission (FERC) issued the District a new 50-year operating license. During 2017, the District selected a design/build partner and has signed an agreement for Phase 1 of the project. Phase 1 is expected to be completed by October 31, 2018, and includes the development of a 30% design/construction schedule and a not-to-exceed construction cost. In addition, the District is reviewing financing options for this project.

The District has substantially completed repairs as a result of damages caused by two years of wildfires. During 2014, the Carlton Complex Fire consumed more than 250,000 acres located in Okanogan County. The District's loss of infrastructure due to the fire was significant, amounting to almost \$3,000,000 in historical costs and an estimated \$14,000,000 in replacement costs. The 2015 Okanogan Complex Fires burned over 300,000 acres located in Okanogan County. The District's loss of infrastructure due to the 2015 fire was in excess of \$1,600,000 in historical costs and an estimated \$3,900,000 in replacement costs. At the end of 2017, the majority of the repairs had been completed from both fires. The District expects to receive future reimbursements from Federal Emergency Management Agency of approximately \$1,300,000 for repairs that have already been completed.

Additional information is contained in the notes to the financial statements. Please refer to Note 3 – Utility Plant and Note 4 – Long-Term Debt.

#### **Contacting the District's Financial Management**

This financial report is designed to provide the District's ratepayers, investors, and other readers with a general overview of the District's finances and to show the District's accountability for money it receives. If you have questions about this report or need additional information, contact the District's Director of Finance at Public Utility District No. 1 of Okanogan County, P.O. Box 912, Okanogan, WA 98840, or phone (509) 422-3310.

#### Note 1 – Summary of Significant Accounting Policies

**Organization** – Public Utility District No. 1 of Okanogan County (the District) is a municipal corporation governed by an elected three-member board of commissioners. The District owns, operates, and maintains an electric distribution system incorporating both electrical and telecommunications facilities and equipment. Financial information for both divisions is presented as a single proprietary fund.

**Reporting entity** – For financial reporting purposes, the District includes activities over which it exercises oversight responsibility. As required by generally accepted accounting principles (GAAP), management has considered all potential component units in defining the reporting entity. The District has no component units.

**Basis of accounting and presentation** – The accounting policies of the District conform to GAAP as applicable to proprietary funds of governmental units. The District adheres to the accounting standards and pronouncements of the Governmental Accounting Standards Board (GASB), which is the accepted standard-setting body for governmental entities and uses the Federal Energy Regulatory Commission (FERC) Uniform System of Accounts.

**New accounting standards** – In June 2015, the GASB issued Statement No. 75, *Financial Reporting for Postemployment Benefits Other Than Pensions*, to improve the usefulness of information about postemployment benefits other than pensions included in the financial statements. This statement is effective for financial statements for fiscal years beginning after June 15, 2017. The District is evaluating the impact of this statement on its financial statements.

In March 2016, the GASB issued Statement No. 82, *Pension Issues – An Amendment of GASB Statements No. 67, No. 68, and No. 73.* This statement addresses issues regarding the presentation of payroll-related measures, classification of payments made by employers to satisfy employee contribution requirements, and deviations from guidance in an Actuarial Standard of Practice. The District adopted this statement in 2017.

In November 2016, the GASB issued Statement No. 83, *Certain Asset Retirement Obligations*, which addresses valuation and disclosure of asset retirement obligations. The statement is effective for financial statements for fiscal years beginning after June 15, 2018. The District is evaluating the impact of this statement on its financial statements.

In January 2017, the GASB issued Statement No. 84, *Fiduciary Activities*, which clarifies when a government entity has a fiduciary responsibility and is required to present fiduciary fund financial statements. The statement is effective for financial statements for fiscal years beginning after December 15, 2018. The District is evaluating the impact of this statement on its financial statements.

In January 2017, the GASB issued Statement No. 86, *Certain Debt Extinguishment Issues*, which addresses the defeasance of debt using a government entities' existing resources. The statement is effective for financial statements for fiscal years beginning after June 15, 2017. The District is evaluating the impact of this statement on its financial statements.

#### Note 1 – Summary of Significant Accounting Policies (continued)

In June 2017, the GASB issued Statement No. 87, *Leases*, which establishes revised standards on lease accounting and financial reporting. The statement is effective for financial statements for fiscal years beginning after December 15, 2019. The District is evaluating the impact of this statement on its financial statements.

**Cash and cash equivalents** – The District considers all highly liquid investments with an original maturity of three months or less to be cash equivalents.

**Investments and restricted assets** – The District records investments at fair value in accordance with GASB 72. The District's investment portfolio consists both of fully insured, interest-bearing institutional deposits with terms of one year or less and Federal loan and mortgage securities where fair value can deviate from face/par value. For information on fair market value at year-end 2017, see Note 2.

In accordance with board resolutions and bond covenants, a number of separate funds have been established, and cash and investments held in these funds are restricted for special uses as follows:

	20	17	2016
Rate stabilization fund	\$ 6, <sup>2</sup>	135,000 \$	6,135,000
Employee compensated absences fund	2,0	000,000	1,600,000
Customer deposit fund	e	600,000	600,000
Sinking funds - 2003 bonds		-	40,426
Sinking funds - 2010 bonds		216,141	216,021
Sinking funds - 2016 bonds		66,820	27,968
Bond reserve fund	1,9	944,500	1,944,500
	<u>\$ 10,9</u>	962,461 \$	10,563,915

Accounts receivable and allowance for doubtful accounts – The District renders billings for electrical consumption, sales, and services and for wholesale power and telecommunications sales and services on a monthly basis. Management reviews accounts receivable for collectibility on a regular basis, and an allowance for uncollectible accounts is established based on evaluation of specific accounts and historical experience. If the account is determined to be uncollectible, it is turned over to the local credit bureau for collection.

**Materials and supplies** – Materials and supplies provide for additions, maintenance, and repairs to the utility plant and are valued at weighted-average cost.

Utility plant and depreciation - See Note 3 for asset capitalization, depreciation, and retirement policies.

**Unamortized loss on refunding of debt** – The difference between the cost to refund outstanding debt and the carrying value of bonds defeased by refunding bonds is deferred and amortized over the shorter of the remaining term of the refunded bonds or the term of the refunding bonds, using the straight-line method and recorded as deferred outflow of resources.

#### Note 1 – Summary of Significant Accounting Policies (continued)

**Compensated absences** – The District accrues unpaid personal leave benefit amounts as earned. Accrued personal leave is payable in full upon resignation, termination, retirement, or death.

Net position - Net position consists of the following:

**Net investment in capital assets** – This component of net position consists of capital assets, net of accumulated depreciation, less outstanding balances of any borrowings that are attributable to the acquisition, construction, or improvement of those assets.

**Restricted** – This component consists of net position on which constraints are placed as to its use. Constraints include those imposed by creditors (such as through debt covenants), contributors, or laws or regulations of other governments or constraints imposed by law through constitutional provisions or through enabling legislation. Balances currently classified as restricted by enabling legislation include the rate stabilization fund, employee compensated absences fund, customer deposit fund, bond principal and interest (net of accrued interest) due in the upcoming year, and the debt service reserve fund.

**Unrestricted** – Unrestricted net position components are those that do not meet the definition of "restricted" or "net investment in capital assets."

**Revenue recognition** – The District recognizes revenue as earned on a monthly basis based on rates established by the District's board of commissioners. Because the customer meters are read and billed at various times during each month, the District estimates unbilled revenues for energy delivered to customers between their last respective cycle billing date and December 31, and it records that amount as unbilled revenue for the current year.

**Revenues and expenses** – The District distinguishes between operating and nonoperating revenues and expenses. Operating revenues and expenses are derived directly from the provision of wholesale and retail electrical generation, transmission, and distribution sales and service and from providing wholesale telecommunications sales and service. Revenues and expenses ancillary to these purposes are treated as nonoperating.

**Contributed capital** – Contributions in aid of construction are District-mandated customer connection charges used to fund construction of system properties necessary to extend service to a new customer. These payments are recognized in nonoperating revenue as contributed capital when the associated facilities are constructed or acquired.

**Accounting estimates** – The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

#### Note 1 – Summary of Significant Accounting Policies (continued)

**Pensions** – For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of all state-sponsored pension plans and additions to/deductions from those plans' fiduciary net position have been determined on the same basis as they are reported by the Washington State Department of Retirement Systems. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments of the plan are reported at fair value.

**Significant risk and uncertainties** – The District is subject to certain business risks that could have a material impact on future operations and financial performance. These risks include weather and naturaldisaster-related disruptions; collective bargaining labor disputes; fish and other Endangered Species Act issues; Environmental Protection Agency regulations; federal government regulations or orders; deregulation of the electrical industry; concentration risk in the form of Wells Hydroelectric Project (Note 11); and, market risks inherent in buying and selling of power, a commodity with inelastic demand characteristics and minimal storage capability.

**Reclassifications** – Certain reclassifications have been made to balances reported in prior-year financial statements to conform to the current-year presentation.

#### Note 2 – Deposits and Investments

The District held the following cash and investments at December 31:

	2017	2016
Cash and Temporary Investments Cash Deposits Money Market Accounts Local Government Investment Pool	\$ 12,391,674 500,000 1,082,054	\$ 12,551,256 500,000 491,090

Restricted Investments		
U.S. Treasuries	2,600,000	1,600,000
Total Restricted Investments	2,600,000	1,600,000
Total Restricted Cash and Investments	\$ 10,962,461	\$ 10,563,915

#### Note 2 – Deposits and Investments (continued)

**Custodial credit risk** – Custodial credit risk is the risk that, in the event of the failure of the counterparty, the District will not be able to recover the value of its investments. All District deposits and investments are either insured, registered, or held by the District or its agents in the District's name and are intended to be held until maturity.

**Credit risk** – Credit risk is the risk that an issuer or counterparty to an investment will not fulfill its obligations. As required by state law, all investments of District funds are obligations of the U.S. government, bankers' acceptances, deposits in the Washington State Treasurer's Local Government Investment Pool, or deposits with Washington State banks and savings and loan institutions. All deposits are either entirely covered by the Federal Deposit Insurance Corporation or by collateral held in a multiple financial institution collateral pool administered by the Washington Public Deposit Protection Commission.

**Interest rate risk** – Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. The District manages this risk by laddering investments and maintaining a variety of investments.

**Investments** – The District holds investments that are measured at fair value as of December 31, 2017. The District categorized its fair value measurements within the fair value hierarchy established by GAAP. The hierarchy is based on the valuation inputs used to measure the fair value of the assets. Level 1 inputs are quoted prices in active markets for identical assets, Level 2 inputs are significant other observable inputs, and Level 3 inputs are significant unobservable inputs. Investments in an external government investment pool, such as the Local Government Investment Pool (LGIP), are not subject to reporting within the level hierarchy.

		Fotal as of ecember 31, 2017	in A Mark Ide As	d Prices active ets for ntical sets vel 1)	Significant Other Dbservable Inputs (Level 2)	Unob Ir	nificant servable aputs evel 3)

Total	\$	1,600,000	\$	_	\$	1,600,000	\$	

#### Note 3 - Utility Plant

Utility plant in service and other capital assets are recorded at cost when the historical cost is known. When historical cost is not known, assets are recorded at estimated fair value. Costs include labor, materials, overhead, capitalized interest, and related indirect costs. The District capitalizes assets with cost in excess of \$1,000. Depreciation expense is computed using the straight-line method employing useful lives of 4 to 50 years. Repairs are charged to operating expenses.

The original cost of operating property retired or otherwise disposed of and the cost of removal, less salvage, is charged to accumulated depreciation. However, in the case of the sale of a significant operating unit or system, the original cost is removed from the utility plant accounts, accumulated depreciation is charged with the accumulated depreciation related to the property sold, and net gain or loss on disposition is credited or charged to income.

Preliminary costs incurred for proposed projects are deferred pending construction of the asset and included in construction work in process. Costs relating to projects ultimately constructed are transferred to utility plant, whereas charges that relate to abandoned projects are expensed.

During two consecutive years (2014 and 2015), the District sustained significant infrastructure damage due to wildfire. The District is still in the process of replacing the damaged infrastructure, including electrical distribution and transmission plant. Work orders pertaining to the 2014 losses were completed and closed to plant during 2016 and no further expenditures or recoveries are expected pertaining thereto. Loss recoveries amounting to \$141,453 were received in 2017 from the Federal Emergency Management Agency (FEMA) and the state of Washington pertaining to the 2015 fires. The District expects additional minor reimbursements in 2018.

#### Note 3 – Utility Plant (continued)

Capital asset activity for the years ended December 31, 2017 and 2016, was as follows:

	Jan	Balance January 1, 2017				Retirements nd Transfers	Balance December 31, 2017

Net utility plant	\$	115,043,427	\$	18,238,987	\$	(10,867,454)	\$	122,414,960

During 2017, the District transferred \$12,793,151 out of construction work in progress into unclassified plant in service related to the substantial completion of the Pateros-Twisp transmission line. The District expects to place in service and begin depreciating all assets related to the Pateros-Twisp transmission line after final completion of the project in 2018. Plant in-service balances presented above include nondepreciable land of \$1,126,051 as of December 31, 2017 and 2016, respectively.

#### Note 4 – Long-Term Debt

In 2003, the District issued \$10,565,000 in 20-year serial bonds to finance capital construction and to refund a previous short-term debt obligation. Interest rates on the 2003 issuances range from 2.46% to 5.46%. The 2003 Series A Bonds were refunded in 2016 by another issuance and the final payments on the 2003 Series B Bonds were made in 2017.

During 2010, the District issued \$9,105,000 in 10-year Series A bonds with interest rates ranging from 2.00% to 4.50%, and \$23,355,000 in 30-year Series B taxable Build America Bonds with interest rates ranging between 1.095% and 6.046%. These interest rates are subject to a federal subsidy payment from the federal government, which was 32.5% of the interest rate during 2017 and 2016. From this issuance, \$5,285,000 was used to defease the 2002 bonds, which were fully repaid in 2011. The remaining \$27,175,000 of the new debt was earmarked for capital projects including, but not limited to, the new District headquarters facility constructed in 2010 and the Pateros-Twisp transmission line, now nearing completion of construction. This debt is subject to certain covenants.

In 2010, the District authorized a not-to-exceed \$3,667,855 loan with the United States Department of Agriculture (USDA) for broadband improvements related to the American Recovery and Reinvestment Act (ARRA) award granted in 2010. During 2011, the District began drawing funds on the loan and as of December 31, 2015, a total of \$3,602,640 in loan funds related to this award had been received. No further draws have been made since. These funds are to be paid back over a 23-year period starting one year after the initial draw. This initial draw occurred on August 15, 2011. This direct cost of money loan will bear interest at the rate applicable to each advance of loan funds based on the average yield on outstanding marketable obligations of the United States, having a final maturity comparable to the final maturity of the advance. Interest rates as of December 31, 2017, ranged from 2.3223% to 3.6342%. Additional information describing this award can be found in Note 9.

Late in 2016, the District made the decision to exercise the option of redeeming its outstanding 2003 Series A Parity Bonds through the issuance of a direct-placement junior-lien refunding bond. The 2016 Junior Lien Refunding Revenue Bond was placed with Key Government Finance, Inc. at an interest rate of 1.82% and will be repaid over the exact same term as the 2003 Series A Bonds that it replaced. Final installments of principal and interest are scheduled be made in 2022. The bonds carry a debt covenant requiring the District to maintain net revenues in each fiscal year that are at least equal to 1.25 times the annual debt service on all outstanding Net Revenue Bonds.

Total long-term debt principal outstanding at December 31, 2017, is \$32,502,789, for which substantially all revenues of the District are pledged as security.

#### Note 4 – Long-Term Debt (continued)

The following are changes in long-term debt for the years ended December 31, 2017 and 2016:

	Balance January 1, 2017	Additions	Payments/ Amortization	Balance December 31, 2017	Current Portion
2003 revenue bonds 2010 revenue bonds 2016 revenue bonds 2011 ARRA loan Unamortized bond	\$ 460,000 26,860,000 4,069,354 3,127,637	\$- - - -	\$ (460,000) (1,145,000) (261,549) (147,653)	\$ - 25,715,000 3,807,805 2,979,984	\$- 1,175,000 732,534 151,803

During 2017, the District replaced its \$10 million operating line of credit with a new \$20 million aggregate principal line with a maturity date of December 31, 2020. The line of credit is comprised of a \$10 million tax-exempt 2018A Note bearing an interest rate of 2.85% and a \$10 million taxable 2018B Note bearing an interest rate of 3.61%. As of December 31, 2017 and 2016, respectively, there was no outstanding balance on either of the lines of credit.

The annual debt service payment requirements (principal and interest) on debt outstanding as of December 31, 2017, are as follows:

	2016	Bond	ls	2010	Bond	S	ARR	A Grai	nt	
	nterest		Principal	 Interest		Principal	 Interest	F	Principal	 Total

#### Note 5 – Retirement and Deferred Compensation Plans

Substantially all of the District's full-time and qualifying part-time employees participate in one of the statewide retirement systems administered by the Washington State Department of Retirement Systems, under cost-sharing, multiple-employer public employee defined benefit and defined contribution retirement plans. The state legislature establishes and amends laws pertaining to the creation and administration of all public retirement systems.

The Department of Retirement Systems (DRS), a department within the primary government of the state of Washington, issues a publicly available comprehensive annual financial report (CAFR) that includes financial statements and required supplementary information for each plan. The DRS CAFR may be obtained by writing to:

Department of Retirement Systems Communications Unit P.O. Box 48380 Olympia, WA 98540-8380

Or the DRS CAFR may be downloaded from the DRS website at www.drs.wa.gov.

The following table represents the aggregate pension amounts for all plans for the years ended December 31:

Aggregate Pens	sion Am	ounts - All Plans	
	2017		 2016
Net pension liability Deferred outflows of resources Deferred inflows of resources Pension expense	\$	5,365,558 944,133 1,347,880 79,052	\$ 7,800,644 1,537,393 306,236 64,119

#### Public Employees' Retirement System (PERS)

PERS members include elected officials; state employees; employees of the Supreme, Appeals, and Superior Courts; employees of the legislature; employees of district and municipal courts; employees of local governments; and higher education employees not participating in higher education retirement programs. PERS is composed of three separate pension plans for membership purposes. PERS Plans 1 and 2 are defined benefit plans, and PERS Plan 3 is a defined benefit plan with a defined contribution component.

PERS Plan 1 provides retirement, disability, and death benefits. Retirement benefits are determined as 2% of the member's average final compensation (AFC) times the member's years of service. The AFC is the average of the member's 24 highest consecutive service months. Members are eligible for retirement from active status at any age with at least 30 years of service, at age 55 with at least 25 years of service, or at age 60 with at least five years of service. Members retiring from active status prior to the age of 65 may receive actuarially reduced benefits. Retirement benefits are actuarially reduced to reflect the choice of a survivor benefit.

Other benefits include duty and non-duty disability payments, an optional cost-of-living adjustment (COLA), and a one-time duty-related death benefit, if found eligible by the Department of Labor and Industries. PERS 1 members were vested after the completion of five years of eligible service. The plan was closed to new entrants on September 30, 1977.

#### Contributions

The PERS Plan 1-member contribution rate is established by state statute at 6%. The employer contribution rate is developed by the Office of the State Actuary and includes an administrative expense component that is currently set at 0.18%. Each biennium, the state Pension Funding Council adopts Plan 1 employer contribution rates. The PERS Plan 1 required contribution rates (expressed as a percentage of covered payroll) for 2017 were as follows:

PERS Plan 1		
Actual Contribution Rates	Employer	Employee
January through June 2017	11.18%	6.00%
July through December 2017	12.70%	6.00%

The District's actual contributions to the plan were \$0 and \$0 for the years ended December 31, 2017 and 2016, respectively.

PERS Plan 2/3 provides retirement, disability, and death benefits. Retirement benefits are determined as 2% of the member's AFC times the member's years of service for Plan 2 and 1% of AFC for Plan 3. The AFC is the average of the member's 60 highest-paid consecutive service months. There is no cap on years of service credit. Members are eligible for retirement with a full benefit at 65 with at least five years of service credit. Retirement before age 65 is considered an early retirement. PERS Plan 2/3 members who have at least 20 years of service credit and are 55 years of age or older are eligible for early retirement with a benefit that is reduced by a factor that varies according to age for each year before age 65. PERS Plan 2/3 members who have 30 or more years of service credit and are at least 55 years old can retire under one of two provisions:

- With a benefit that is reduced by 3% for each year before age 65; or
- With a benefit that has a smaller (or no) reduction (depending on age) that imposes stricter return-towork rules.

PERS Plan 2/3 members hired on or after May 1, 2013, have the option to retire early by accepting a reduction of 5% for each year of retirement before age 65. This option is available only to those who are age 55 or older and have at least 30 years of service credit. PERS Plan 2/3 retirement benefits are also actuarially reduced to reflect the choice of a survivor benefit. Other PERS Plan 2/3 benefits include duty and non-duty disability payments, a cost-of-living allowance (based on the consumer price index), capped at 3% annually and a one-time duty-related death benefit, if found eligible by the Department of Labor and Industries. PERS 2 members are vested after completing five years of eligible service. Plan 3 members are vested in the defined benefit portion of their plan after ten years of service, or after five years of service if 12 months of that service is earned after age 44.

PERS Plan 3 defined contribution benefits are totally dependent on employee contributions and investment earnings on those contributions. PERS Plan 3 members choose their contribution rate upon joining membership and have a chance to change rates upon changing employers.

As established by statute, Plan 3 required defined contribution rates are set at a minimum of 5% and escalate to 15% with a choice of six options. Employers do not contribute to the defined contribution benefits. PERS Plan 3 members are immediately vested in the defined contribution portion of their plan.

#### Contributions

The PERS Plan 2/3 employer and employee contribution rates are developed by the Office of the State Actuary to fully fund Plan 2 and the defined benefit portion of Plan 3. The Plan 2/3 employer rates include a component to address the PERS Plan 1 unfunded actuarial accrued liability and an administrative expense that is currently set at 0.18%. Each biennium, the state Pension Funding Council adopts Plan 2 employer and employee contribution rates and Plan 3 contribution rates. The PERS Plan 2/3 required contribution rates (expressed as a percentage of covered payroll) for 2017 were as follows:

PERS Plan 2/3 Actual Contribution Rates	Employer 2/3	Employee 2	Employee 3
January through June 2017	11.18%	6.12%	Varies
July through December 2017	12.70%	7.38%	Varies

The District's actual contributions to the plan were \$892,670 and \$816,064 for the years ended December 31, 2017 and 2016, respectively.

#### **Actuarial Assumptions**

The total pension liability (TPL) for each of the DRS plans was determined using the most recent actuarial valuation completed in 2017 with a valuation date of June 30, 2016. The actuarial assumptions used in the valuation were based on the results of the Office of the State Actuary's (OSA) 2007–2012 Experience Study and the 2015 Economic Experience Study.

Additional assumptions for subsequent events and law changes are current as of the 2016 actuarial valuation report. The TPL was calculated as of the valuation date and rolled forward to the measurement date of June 30, 2017. Plan liabilities were rolled forward from June 30, 2016, to June 30, 2017, reflecting each plan's normal cost (using the entry-age cost method), assumed interest, and actual benefit payments.

- Inflation: 3% total economic inflation; 3.75% salary inflation
- Salary increases: In addition to the base 3.75% salary inflation assumption, salaries are also expected to grow by promotions and longevity
- Investment rate of return: 7.5%

Mortality rates were based on the RP-2000 report's Combined Healthy Table and Combined Disabled Table, published by the Society of Actuaries. The OSA applied offsets to the base table and recognized future improvements in mortality by projecting the mortality rates using 100% Scale BB. Mortality rates are applied on a generational basis, meaning that each member is assumed to receive additional mortality improvements in each future year throughout his or her lifetime.

There were minor changes in methods and assumptions since the last valuation. Those applicable to the District are listed below:

• For Plan 2, the assumed valuation interest rate was lowered from 7.8% to 7.7%. Assumed administrative factors were updated.

#### **Discount Rate**

The discount rate used to measure the total pension liability for all DRS plans was 7.5%.

To determine that rate, an asset sufficiency test included an assumed 7.7% long-term discount rate to determine funding liabilities for calculating future contribution rate requirements. Consistent with the long-term expected rate of return, a 7.5% future investment rate of return on invested assets was assumed for the test. Contributions from plan members and employers are assumed to continue being made at contractually required rates (including PERS 2/3 employers, whose rates include a component for the PERS 1 liabilities). Based on these assumptions, the pension plans' fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return of 7.5% was used to determine the total liability.

#### Long-Term Expected Rate of Return

The long-term expected rate of return on the DRS pension plan investments of 7.5% was determined using a building-block-method. In selecting this assumption, the Office of the State Actuary (OSA) reviewed the historical experience data, considered the historical conditions that produced past annual investment returns, and considered capital market assumptions and simulated expected investment returns provided by the Washington State Investment Board (WSIB). The WSIB uses the capital market assumptions and their target asset allocation to simulate future investment returns at various future times.

#### Estimated Rates of Return by Asset Class

Best estimates of arithmetic real rates of return for each major asset class included in the pension plan's target asset allocation as of June 30, 2017, are summarized in the table below. The inflation component used to create the table is 2.2% and represents the WSIB's most recent long-term estimate of broad economic inflation.

Asset Class	Target Allocation	Percent Long-Term Expected Real Rate of Return Arithmetic
Fixed income	20%	1.70%
Tangible assets	5%	4.90%
Real estate	15%	5.80%
Global equity	37%	6.30%
Private equity	23%	9.30%
	100%	

#### Sensitivity of Net Pension Liability (Asset)

The table below presents the District's proportionate share of the Net Pension Liability (NPL) calculated using the discount rate of 7.5%, as well as what the District's proportionate share of the NPL would be if it were calculated using a discount rate that is 1 percentage point lower (6.5%) or 1 percentage point higher (8.5%) than the current rate.

			Current			
	1% Decrease (6.5%)		Discount Rate (7.5%)		1% Increase (8.5%)	
PERS 1 PERS 2/3	\$ 3,365,99 7,011,27		2,763,106 2,602,452	\$	2,240,879 (1,009,927)	

#### **Pension Plan Fiduciary Net Position**

Detailed information about the State's pension plans' fiduciary net position is available in the separately issued DRS financial report.

# Pension Liability, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At December 31, 2017, and 2016, the District reported a total pension liability of \$5,365,558 and \$7,800,644, respectively, for its proportionate share of the net pension liabilities as follows:

		Lial	oility	lity			
		2017		2016			
PERS 1	\$	2,763,106	\$	3,548,754			
PERS 2/3	Ŷ	2,602,452	Ŧ	4,251,890			

At December 31, 2017, the District's proportionate share of the collective net pension liabilities was as follows:

	Proportionate	Proportionate	Change in
	Share 6/30/16	Share 6/30/17	Proportion
PERS 1	0.066079%	0.058231%	-0.007848%
PERS 2/3	0.084448%	0.074901%	-0.009547%

Employer contribution transmittals received and processed by the DRS for the fiscal year ended June 30 are used as the basis for determining each employer's proportionate share of the collective pension amounts reported by the DRS in the *Schedules of Employer and Nonemployer Allocations*.

# Public Utility District No. 1 of Okanogan County, Washington Notes to Financial Statements

#### Note 5 – Retirement and Deferred Compensation Plans (continued)

#### **Pension Expense**

For the years ended December 31, 2017 and 2016, the District recognized pension expense as follows:

	 Pension	Expens	е
	 2017		2016
PERS 1	\$ (242,911)	\$	(422,111)
PERS 2/3	321,963		486,230

#### Deferred Outflows of Resources and Deferred Inflows of Resources

At December 31, 2017, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

PERS 1		red Outflows Resources		erred Inflows Resources
Differences between expected and actual experience Net difference between projected and actual investment earnings on pension plan investments Changes of assumptions Changes in proportion and differences between	\$	- - -	\$	- (103,111) -
contributions and proportionate share of				
contributions Contributions subsequent to the measurement date		- 221,643		-
	\$	221,643	\$	(103,111)
	Defer	red Outflows	Defe	erred Inflows
PERS 2/3	of F	Resources	of	Resources
Differences between expected and actual experience	of F \$	Resources 263,690	of \$	
Differences between expected and actual experience Net difference between projected and actual investment earnings on pension plan investments Changes of assumptions Changes in proportion and differences between				Resources
Differences between expected and actual experience Net difference between projected and actual investment earnings on pension plan investments Changes of assumptions		263,690		Resources (85,590)

Combined PERS 1 and PERS 2/3		red Outflows Resources		Deferred Inflows of Resources			
Differences between expected and actual experience	\$	263,690	\$	(85,590)			
Net difference between projected and actual investment earnings on pension plan investments	Ť		Ŧ	(796,862)			
Changes of assumptions Changes in proportion and differences between		27,643		-			
contributions and proportionate share of contributions		106 170		(465 400)			
Contributions Subsequent to the measurement date		106,470 546,330		(465,428)			
	\$	944,133	\$	(1,347,880)			

Deferred outflows of resources related to pensions resulting from the District's contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended December 31, 2017. Other amounts reported as deferred outflows and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

	F	PERS 1	F	PERS 2/3	C	ombined		
2018 2019 2020 2021 2022	\$	(69,696) 22,004 (5,109) (50,310)	\$	(307,984) (3,361) (126,458) (334,805) (32,330)	\$	(377,680) 18,643 (131,567) (385,115) (32,330)		
Thereafter				(42,028)		(42,028)		
	\$	(103,111)	\$	(846,966)	\$	(950,077)		

**Deferred compensation plans** – The District offers its employees two deferred compensation plan options created in accordance with Internal Revenue Code Section 457, covering all eligible employees of the District, as defined in the plan documents. These plans allow employees to defer a portion of their salary until future years. Plan assets are held in trust for the exclusive benefit of the plan participants and their designated beneficiaries and are not subject to the claims of the District's general creditors. Deferred compensation funds are not available to employees until retirement, termination, death, or unforeseeable emergency.

Additionally, the District adopted a 401(a) defined contribution plan (the 401(a) Plan) effective January 1, 2000. Participation in the 401(a) Plan is open to eligible employees of the District as defined in the plan document. The District makes matching contributions to the 401(a) Plan at a rate of 50% of the employee's contribution to their 457 deferred compensation plan. The match is capped at 2% of gross wages for nonexempt employees and 6% of gross wages for exempt employees. During 2017 and 2016, the District contributed \$239,241 and \$222,443, respectively, to the 401(a) Plan.

**VEBA plan** – In August 2005, the District implemented a voluntary employees' beneficiary association (VEBA) plan designed to provide limited employer funding on a tax-free basis for employee medical premiums and benefits for all eligible employees of the District, as defined in the plan document. The District's current VEBA contribution rate is \$150 per month per employee for all employees having met the annual qualification requirements. Plan assets, although under District control, are held in trust for the exclusive benefit of the plan participants and their designated beneficiaries and are not subject to the claims of the District's general creditors. During 2017 and 2016, the District contributed \$160,800 and \$157,650, respectively, to the VEBA plan.

#### Note 6 – Other Post-Employment Benefits

Effective January 1, 2015, the partial reimbursement for health care insurance premiums for retired employees is discontinued. In lieu thereof, an HRA VEBA contribution will be made by the District for employees voluntarily separating service after December 31, 2014, and who have reached their 50th birthday as of their separation date/last date of employment. Employees separating service between January 1, 2015, and December 31, 2015, are eligible for \$4 times years of service times remaining months between their 60th and 65th birthday. The dollar value of the contribution is set to decrease \$1 each year until it expires on December 31, 2018. The estimated future liability is \$8,806 and \$27,245 at December 31, 2017 and 2016, respectively. The District is funding this liability on a pay-as-you-go basis with contributions of \$6,967 and \$6,450 expensed in 2017 and 2016, respectively.

#### Note 7 – Self Insurance

The District is a member of Public Utility Risk Management Services Joint Self Insurance Fund (the Fund). Chapter 48.62 RCW authorizes the governing body of one or more governmental entities to form together into or join an organization for the joint purchasing of insurance, and/or joint self-insuring, and/or joint hiring or contracting for risk management services to the same extent that they may individually purchase insurance, self-insure, or hire or contract for risk management services. The Fund was formed on December 31, 1976, when certain Washington Public Utility Districts signed an agreement to pool their self-insured losses and jointly purchase insurance and administrative services. There are currently 19 active members in the Fund.

#### Note 7 – Self Insurance (continued)

The Fund operates three separate insurance pools: the Liability Pool, the Property Pool, and the Health and Welfare Pool. Fund members may belong to one, two, or all three pools according to their insurance needs. The Liability Pool insures on a \$1,000,000 self-insured retention with a \$250 deductible. Coverage is on an occurrence basis. In addition, the Liability Pool purchases excess general liability and excess public official liability coverage. The Property Pool operates on a maximum \$500,000 self-insured retention, with a \$75,000 deductible on listed major generating units and a \$250 deductible on all other listed items of property. Coverage is on an occurrence basis and the Property Pool purchases excess property coverage above the self-insured retention level. The Health and Welfare Pool is funded by paid claims reimbursement from the member generating the claim and by pooled assessment for administration and excess stop-loss insurance coverage. In all pools, members are assessed as necessary to maintain designated minimum pool balances. Because the Fund is a cooperative program, there is joint liability among the participants of each pool. The District participates in only the Liability and Property Pools. In 2017 and 2016, the District contributed \$98,390 and \$115,705, respectively, to the Liability Pool and \$56,743 and \$38,282, respectively, to the Property Pool. Should any member terminate its affiliation with the Fund, it remains financially responsible to the Fund for any unresolved, unreported, and in-process claims for the period that it was a signatory to the agreement.

Self-insured retentions are fully funded by current and former members, and claims settlements have rarely exceeded retention levels resulting in escalation to excess coverage policies. Claims are processed by Pacific Underwriters Corporation, P.O. Box 68787, Seattle, WA 98168, a private entity contracted to perform administrative, claims adjustment, and loss prevention services, and which also compiles an annual financial report for the Fund. The Fund is governed by a board of directors that consists of one designated representative from each participating member. The Fund administrator and an elected six-member administrative committee (on which a District representative currently serves) are responsible for business decision-making and conducting the daily business affairs of the Fund.

#### Note 8 – Conservation Programs

The District operates a number of energy conservation programs. These include both residential and commercial weatherization loan programs, appliance and water heater rebate programs, appliance loan programs, and residential and commercial energy audits. Loan programs will provide five-year loans of up to \$10,000 on residential dwellings and up to \$25,000 on commercial enterprises for qualifying conservation measures. The District incurred conservation program costs of \$230,973 and \$47,904 in 2017 and 2016, respectively, which were charged to operations.

#### Note 9 – Telecommunications

The District has recognized the necessity of a modern and reliable communications infrastructure in managing its core electric distribution function and now operates and maintains a telecommunications network providing these services for internal use. Additionally, it provides wholesale telecommunications services, in accordance with Washington State law, to qualified retail merchants who, in turn, provide services to end users in the District's service territory.

#### Note 9 – Telecommunications (continued)

The ongoing construction and the operations of the telecommunications network are being accomplished using the District's own workforce. The District has established separate detailed accounting for wholesale telecommunications activities and has developed a financing arrangement under which the continuing construction of telecommunications infrastructure and the operations of the telecommunications network are accomplished using funds loaned from the District's electric reserves.

Condensed telecom revenues and expenditures and assets and liabilities information follows:

	 2017	 2016
Operating revenues Operating expenses Nonoperating revenues Nonoperating expenses	\$ 2,938,026 (2,646,466) 22,041 (149,137)	\$ 2,694,577 (2,638,720) - (203,917)
Change in net position	\$ 164,464	\$ (148,060)
Total assets Total liabilities	\$ 8,570,322 (3,751,534)	\$ 8,773,985 (4,119,660)
Total net position	\$ 4,818,788	\$ 4,654,325

During 2010, the District applied for and was awarded ARRA funding to further deploy broadband communication services in the underserved areas of Okanogan County. The award package consisted of \$5,501,782 in grant money and a \$3,667,855 loan. The project was designed to bring high-speed broadband to approximately 6,543 premises that previously lacked access, and called for placement of approximately 170 access nodes and 179 miles of fiber backbone. The project was completed in 2015 with the District having received a total of \$5,403,960 in grant funding and \$3,602,640 in loan funding against the accumulated project expenditures (see Note 4 for detail of debt service on this loan).

#### Note 10 – Energy Northwest

**ENW Nuclear Project Nos. 1, 2, and 3** – The District has entered into "net billing agreements" with Energy Northwest (ENW, formerly Washington Public Power Supply System) and the Bonneville Power Administration (BPA). Under terms of these agreements, the District has purchased a maximum of .255% and 1.042% of the capability of ENW's Nuclear Project Nos. 1 and 2, respectively, and .143% of the capability of ENW's 70% ownership share of its Nuclear Project No. 3, and has assigned this capability to BPA. BPA is unconditionally obligated to pay the District, and the District is unconditionally obligated to pay ENW, the pro rata share of the total annual costs of each project, including debt service on revenue bonds issued to finance the projects, whether or not the projects are completed, operable, or operating and notwithstanding the suspension, reduction, or curtailment of the projects' output.

#### Note 10 – Energy Northwest (continued)

Nuclear Project Nos. 1 and 3 were approximately 63% and 75% complete, respectively, and had both been in a state of extended construction delay for many years, with all systems being maintained in condition to resume construction at any time. However, on May 13, 1994, the ENW full board of directors voted to declare termination of both projects. At this juncture, there has been no resolution concerning the final dispensation of the assets and liabilities associated therewith.

Nuclear Project No. 2 was completed and placed in operation on December 13, 1984.

The District's net billing obligations in 2017 and 2016 were as follows:

ENW Fiscal 2018 Budget Year	No. 1	No. 2	No. 3	Total
Annual budget	\$ 84,765,000	\$ 585,425,000	\$ 115,883,000	\$ 786,073,000
District's share	0.00255	0.01042	0.00143	-
District's net billing obligation	216,151	6,100,129	165,713	6,481,992
ENW Fiscal 2017 Budget Year				
Annual budget	\$ 60,017,000	\$ 662,326,000	\$ 86,685,000	\$ 809,028,000
District's share	0.00255	0.01042	0.00143	-
District's net billing obligation	153,043	6,901,437	123,960	7,178,440

**Hanford project** – In accordance with agreements between ENW, BPA, and 76 participants and between ENW and the U.S. Department of Energy (DOE), ENW constructed the Hanford Project, which began commercial operation in 1966 with a capacity of approximately 860 MW.

Pursuant to an exchange agreement entered into between the District, ENW, and BPA, the District had purchased .424% of the output of the Hanford Project and is obligated to pay ENW the same percentage of the annual costs.

Under an exchange agreement with the other participants in the Hanford Project, BPA had acquired the capability of the Hanford Project, including the District's share, in exchange for power from BPA. A decision was made in February 1988 by the DOE to maintain the project in a "cold standby" mode of operation.

ENW has evaluated alternative energy uses for the plant to no avail. Current options include a transfer to DOE for removal and site restoration, or removal and site restoration by ENW. At this time, it is unknown what the eventual disposition of the Hanford Project will be. ENW has reduced the project's assets to net realizable value and accrued the estimated cost of removal and site restoration.

**Nine Canyon Wind Project** – On October 1, 2001, the District entered into a power purchase agreement with ENW for output from the Nine Canyon Wind Project. The original project consisted of 37 wind turbines, with an aggregate generating capacity of approximately 48 MW, and was launched into commercial operation in fall 2002. During 2003, a second phase of the project was completed, adding an additional 12 turbines and bringing the project capacity up to about 63.7 MW. During 2006, a third phase of the project was completed, adding an additional 14 turbines and bringing the current total project capacity up to about 96 MW.

#### Note 10 – Energy Northwest (continued)

The District is currently one of 10 public utility districts participating in the power purchase agreements for project output. The District purchased a 25% share of the generation output from Phases 1 and 2 and no output at all from Phase 3, bringing its combined share of total project output to 16.61%. The District is committed to paying its pro rata share of debt service on the Nine Canyon Wind Project Revenue Bonds issued by ENW for Phases 1 and 2. A bond refunding/reissuance process commenced in 2004 and completed in 2005, thereby establishing the District's estimated liability for project bond principal at \$23,312,500. That amount could escalate to as much as \$29,140,625 after a step-up provision that could trigger in the event that other purchasers defaulted on their contractual obligations. The District pays its share of the ongoing project operational costs through monthly power purchase agreement assessment invoices.

Financial and operating information regarding Energy Northwest may be obtained from Energy Northwest at PO Box 968, Richland, WA, 99352.

#### Note 11 – Other Power Supply Agreements

**Wells Hydroelectric Project** – Since the initial construction of the Wells Hydroelectric Project, the District has been a party to a power sales contract governing the apportionment of the project output. The District's current share of the total output from Wells Hydroelectric Project is 7.64%, which represents 35.91% and 35.55% of the District's total power purchases in 2017 and 2016, respectively. During the 1980s, both the District and Public Utility District No. 1 of Douglas County (Douglas PUD) contested several provisions of the 1963 agreement and sought resolution of the disputed issues in Chelan County Superior Court. Disputes between the parties were resolved with a Memorandum of Understanding signed on August 5, 1991, requiring the two Districts to negotiate a new power sale contract commencing in September 2018 and extending for an additional 50 years. Negotiations on this contract had been ongoing for a number of years and were recently concluded with the placement of the final signatures on May 15, 2017. The terms of the contract will allow the District's portion of the project output to grow relative to its increasing loads until peaking at a 30% share. The District's annual contractual purchases are to be priced at its respective output percentage multiplied by the actual annual Wells Project cost of production and operation.

**Enloe Hydroelectric Project** – For several decades the District has been pursuing the possible rehabilitation of Enloe Hydroelectric Dam on the Similkameen River near Oroville, Washington. The District is the present owner of the dam, and relicensing attempts prior to 2005 were intended to revive an existing facility with its original output of 26,000 MWh annually and installed capacity of 4,100 KW.

On March 3, 1983, and again on September 13, 1996, the District obtained FERC licenses for renovation and resumed operation of the Enloe project. In both cases, the licenses were later rescinded due to appeals of the licensing provisions, open-ended opportunities for Federal agencies to modify the terms, the potential of requiring fish passage after the fact, and the listing of new endangered species.

On January 21, 2005, the District again submitted a new application to FERC for a preliminary permit on the project using the FERC Traditional Licensing Process (TLP). The proposed configuration would approximately double the project output to 47,300 MWh of energy per year and 9,000 KW of capacity.

#### Note 11 – Other Power Supply Agreements (continued)

Since then, the District has spent the better part of a decade on environmental assessments, resource studies, permitting issues, and litigation. On August 31, 2011, FERC issued the Final Environmental Assessment for the Enloe Hydroelectric Project, and the District continued in the development of the state and local permitting processes. The District received its Section 401 Water Quality Permit in late 2012, but it was immediately appealed by various environmental groups before finally being settled by the Washington State Pollution Control Hearing Board. FERC issued the District a new 50-year operating license on July 9, 2013, and the District began preparing for final design, financing, bidding, and construction. While the District continued its compliance with all license terms for the project, in early 2015, it was determined that the District was encountering some time constraints, so on March 19, 2015, the District submitted a request for a two-year extension of the commencement of construction deadline. The extension was subsequently granted on July 31, 2015, and on May 9, 2016, the District Board of Commissioners formally declared by Resolution #1620 their intent to construct a new power house and reenergize Enloe Dam. A Design-Build Contract has been signed for Phase 1 of the project on April 16, 2018.

#### Note 12 – Northwest Open Access Network

The District is a member of Northwest Open Access Network (NoaNet), a nonprofit mutual corporation formed by the District in collaboration with several other public utilities in the state of Washington. NoaNet was incorporated in February 2000 to facilitate the construction of a communications backbone to accommodate the increasing broadband needs of the member utilities and their customers. The NoaNet network began commercial operation in early 2001.

In July 2001, NoaNet issued \$27 million in Telecommunications Network Revenue Bonds (taxable) to finance the repayment of startup funds advanced by founding members and the initial costs of construction and commissioning. These bonds were fully paid-off during 2015.

As of December 31, 2016, NoaNet had a \$13 million line of credit with Wells Fargo Bank with an outstanding balance of \$9,350,638. In early 2017, they established a new banking relationship with Washington Trust Bank creating three new accounts through which they retired all outstanding Wells Fargo debt. The accounts created were a seven-year Long-Term Loan in the amount of \$10.2 million, a \$5 million Capital Line of Credit, and a \$2 million Operating Line of Credit. The balances owed on the three accounts at December 31, 2017 are \$9,228,014, \$2,280,000, and \$700,000 respectively.

The District's ownership interest in NoaNet was 8.04% as of December 31, 2017 and 2016. During 2017, NoaNet incurred a net loss from operations of \$6,216,302. This operating loss, partially offset by interest revenue but increased by interest expense, reduced net position of \$74,845,140 in 2016 to \$68,053,411 in 2017. NoaNet financial results for 2017 are estimated, however, any variance will not have a material impact on the District's financial position.

Financial and operating information regarding NoaNet may be obtained from the NoaNet Financial Center, 5802 Overlook Ave NE, Tacoma, WA 98422.

#### Note 13 – Pending Litigation

**Pateros-Twisp transmission line** – For many years, the District sought to construct a second transmission line into the Methow Valley. This new line, along with a proposed new substation, would alleviate the current issues of both marginal electrical capacity and reliability. A coalition of local citizens and environmental groups consistently opposed the project and challenged the validity of the District's Final Environmental Impact Statement (FEIS) on grounds of various alleged deficiencies. The challenges of the FEIS made their way through the Okanogan County Superior Court and the Washington State Court of Appeals before finally being denied hearing by the Washington State Supreme Court on December 2, 2008.

During 2009, the District started the process of acquiring right-of-way easements and various other permits required for construction. Condemnation proceedings were initiated against two landowners, one being a private individual and one being a state entity, to obtain the remaining easements necessary to complete the route. In 2010, Okanogan County Superior Court granted "public use and necessity" against the two landowners. The condemnation process moved to the appraisal stage and a court date was set for July 5, 2011, to determine values for the take. This hearing date was subsequently stayed when the Washington State Department of Natural Resources (DNR) appealed to the Washington State Supreme Court for review of the District's authority and ability to exercise condemnation authority against a State Agency. The Washington State Supreme Court heard the case on February 25, 2014, and on January 29, 2015, issued a ruling upholding the District's condemnation authority. Throughout the latter half of 2015, fair compensation was negotiated and access to the route was obtained. On April 1, 2016, groundbreaking for the project took place near Gold Creek. Construction of the transmission line continued through much of 2016 and 2017 and the line is approaching completion. The proposed substation associated with the line has been placed in a pending status.

**Employee termination litigation** – The District's Board of Commissioners terminated the District's General Manager for cause on October 23, 2017. A lawsuit alleging wrongful discharge and breach of contract has been initiated by the former General Manager in Okanogan County Superior Court. The District's insurance provider has retained legal counsel to provide defense in the case, however, judgements levied in breach of contract cases are not insurable and the outcome of the such lawsuits cannot be predicted.

**Other litigation** – The District is involved in various claims arising in the normal course of business. The District does not believe that the ultimate outcome of these matters will have a material adverse impact on its financial position or results of operations.

#### Report of Independent Auditors on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

To the Commissioners Public Utility District No. 1 of Okanogan County, Washington

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of Public Utility District No. 1 of Okanogan County, Washington (the District), which comprise the statements of net position as of December 31, 2017, and the related statements of revenues, expenses, and changes in net position and cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated May 25, 2018.

#### **Internal Control Over Financial Reporting**

In planning and performing our audit of the financial statements, we considered the District's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we do not express an opinion on the effectiveness of the District's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control such that such as the prevented of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be significant deficiencies or material weaknesses. However, material weaknesses may exist that have not been identified.

#### **Compliance and Other Matters**

As part of obtaining reasonable assurance about whether the District's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

#### **Purpose of this Report**

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
