Mr. John R. Grubich
General Manager
Okanogan County Public Utility District
1331 2nd Avenue North
Okanogan, Washington 98840
Subject: 2010 Electric System Rate Study
Dear Mr. Grubich:
R. W. Beck, Inc., is pleased to submit this final report of the 2010 Electric System Rate Study for Okanogan County Public Utility District. This report sets forth and summarizes the methodology, analyses and final results of the District's rate review process.
The rate review process and the preparation of this report was a collaborative effort by District staff, the District's Board of Commissioners and our staff. On behalf of R. W. Beck, Tim Bears and I wish to express our appreciation for the friendly cooperation and assistance of those who provided the timely information and review necessary for the successful completion of this study.
Once again, we appreciate the opportunity to provide continued services to the District.
Sincerely,
R. W. BECK, INC.
Richard Cuthbert

## Background

In 2008, Public Utility District No. 1 of Okanogan County (the District) requested that R. W. Beck complete a Cost-of-Service Study ( 2008 COS Study) for the District to evaluate its existing rates relative to cost-of-service levels. The 2008 COS Study was completed in May 2009, and provided District staff and the Board of Commissioners with information regarding the cost of service of serving its customer classes, and how this compared to its existing rates.

The District's last rate changes were made in 2001 based on across-the-board rate increases for all customer classes to meet the financial needs at that time without reference to a cost-of-service study. In 2009, R. W. Beck was retained to provide the District a 2010 Electric System Rate Study (2010 Rate Study) which would update the 2008 COS Study, reflect a test year (TY) 2010 rate study period, and provide rates to go in effect during 2010 if necessary.
R. W. Beck was also retained in 2009 to complete an Equity Management Plan Study (2010 EMP) to evaluate the long-term financial impacts of several operational and financial changes to the Okanogan system. Results of this analysis were presented in a separate report dated March 2010. The results of the 2010 EMP were used as the basis for the TY 2010 revenue requirements used in this rate study along with the determination of revenue requirements and rate change options for the TY 2010 to TY 2012 time period.
The District currently has six major customer classes, ${ }^{1}$ each with separate rates. The customer and rate classes are defined as follows:

- Residential: Service applicable to each individual customer/family residing in a single family dwelling or multiple family building, and to a farm which processes only its own products.
- General Service: Service applicable to any one individual customer complex for which another specific rate schedule is not available.
- Primary Industrial: Service applicable to any load with measured monthly demand of at least $1,000 \mathrm{~kW}$ and not more than a $10,000 \mathrm{~kW}$ average annual increase.
- Irrigation: Applicable to service for irrigation or drainage and incidental farm use. The schedule is based on continuous service for the irrigation season of April 1 through October 31.

[^0]- Frost Control: Applicable to service to wind machines or pumps used only for frost protection.
- Street Lighting: Applicable to any publicly owned organization constituted by State law for lighting of streets, alleys and thoroughfares.

All of these customer classes have a monthly basic charge and one or more energy charges with either uniform or declining block rate structures. The General Service and Industrial classes also have demand charges applicable to certain customers in these customer classes. The District's current rates are summarized in Table 1-1.

Table 1-1
Okanogan County PUD
Existing Rates as of March 2010

|  | Rates | Units |
| :---: | :---: | :---: |
| Residential Rates |  |  |
| Basic Charge | 10.00 | dollars per month |
| Energy Charge | 4.400 | cents per kWh |
| Minimum Charge | 10.00 | dollars per month |
| General Service Rates |  |  |
| Basic Charge | 12.00 | dollars per month |
| Energy Charge |  |  |
| 0-15,000 kWh | 5.300 | cents per kWh |
| 15,000+ kWh | 4.800 | cents per kWh |
| Demand Charge | 2.00 | dollars per kW > 50 kW per month |
| Minimum Charge | 12.00 | dollars per month |
| Industrial Rates |  |  |
| Basic Charge | 760.00 | dollars per month |
| Energy Charge | 3.750 | cents per kWh |
| Demand Charge | 2.25 | dollars per kW per month |
| Minimum Charge | 760.00 | dollars per month |
| Irrigation Rates |  |  |
| Horsepower |  |  |
| 0-74.9 HP | 1.55 | dollars per HP per month |
| 75+ HP | 1.00 | dollars per HP per month |
| Energy Charge | 2.870 | cents per kWh |
| Frost Control Rates |  |  |
| Facilities Charge | 3.45 | dollars per HP per year |
| Energy Charge | 5.300 | cents per kWh |
| Street Lighting Rates |  |  |
| 175W MVP or 100W HPS | 6.40 | dollars per month |
| 400W MVP or 200W HPS | 9.80 | dollars per month |

## Objectives

The District identified the following objectives for the 2010 Rate Study:

- Provide the District’s staff and Board with updated electric system cost-ofservice information for a TY 2010 study period.
- Use the TY 2010 cost-of-service information and final 2010 EMP results to identify one or more sets of rate changes the District could implement for its existing and potential new customer classes for the District's review and consideration.
- Develop final rate design for the TY 2010, 2011, and 2012 time periods for the District's review and consideration.

## The Rate Review Process

The results of the 2010 EMP analysis showed that the District needed several rate increases in the future to maintain adequate debt service coverage (DSC) and times interest earned ratio (TIER) levels, and to maintain adequate cash reserves. The base case scenario projected a 12 percent retail revenue increase to be necessary in 2010. This 12 percent increase is the basis for the projected TY 2010 revenue requirements and cost-of-service analysis presented later in this report.
Given the significant level of rate increase projected in 2010, District staff and the Board of Commissioners wished to explore alternative rate increases that would moderate the impact on customers and provide more rate stability while continuing to meet the financial targets of the District. Two alternatives were analyzed in the 2010 EMP analysis: one which projected back-to-back 8.5 percent retail revenue increases in 2010 and 2011, and another which projected 6.5 percent retail revenue increases in each year from 2010 through 2012. The proposed rates presented in this report reflect 6.5 percent retail revenue increases in each year from 2010 through 2012.

Using the TY 2010 cost-of-service analysis, a number of alternative rate design options were developed and presented to the District for its review and consideration. Following receipt of feedback on these options, a final draft rate design and proposed rates to become effective on July $1^{\text {st }}$ of 2010, 2011, and 2012 were developed. ${ }^{2}$

These proposed rates were presented in a series of public meetings in the District during April 2010, and, based on input received at the meetings, the District's Board adopted Resolution No. 1506 authorizing the final rates developed in this study at a meeting held on May 4, 2010. A copy of this resolution is provided in Appendix F of this report.

[^1]In addition, the Board approved as part of the resolution the following measures:

- Implementation of automatic rate adjustments to reflect any significant increase or decrease in the cost of power from contracted power sources within 30 days of the District incurring such increase or decrease, unless suspended by a Resolution of the Board of Commissioners.
- Enactment of future annual retail revenue rate increases of 3.0 percent per year beginning in 2013 and occurring every year thereafter, unless any such annual increase is suspended by a resolution of the Board of Commissioners.

## Report Organization

This report is organized into four sections plus appendices. General information including background information and objectives of the study are provided in Section 1. The development of the District's TY 2010 revenue requirements analysis is presented in Section 2. The methodology and results for the TY 2010 cost-ofservice analysis are summarized in Section 3. A discussion related to the development of the Board adopted rate design adjustments is provided in Section 4. Detailed analyses of the study are provided in Appendices A through E and a copy of Resolution No. 1506 is provided in Appendix F.

## Overview

The District's revenue requirements for this rate study were based on information originally developed in the District's 2010 EMP study prepared separately by R. W. Beck and dated March 2010. Revenue requirements consist of the sum of the electric system's operating costs plus an amount associated with meeting the electric system's debt and capital funding needs for a test year period.
The projected 2010 test year revenue requirements results used in this study were projected starting from audited 2008 financial statements. Projections were adjusted as necessary for known and measurable changes to expenses (e.g., purchased power expense increases) and are consistent with the 2010 budget adopted by the District's Board of Commissioners on December 19, 2009. The detailed tables showing TY 2010 revenue requirements analysis used in this study are provided in Appendix A.

## Revenue Requirements

Table 2-1 provides a summary of the District's projected operating results for 2010, the pro forma adjustments, and the adjusted TY 2010 revenue requirements. The DSC and TIER levels shown are consistent with the financial targets established by District staff as part of the 2010 EMP study. The adjusted TY 2010 revenue requirements show the need for an increase in retail rate revenues of 12 percent on an annual basis. The adjusted TY 2010 revenue requirements were used as the basis for the cost-ofservice analysis presented in the next section of this report.

## Table 2-1 <br> Okanogan County PUD Summary of Test Year 2010 Revenue Requirements

| Description | Projected Test Year 2010 | Pro forma Adjustments (1) | Adjusted <br> Test Year 2010 |
| :---: | :---: | :---: | :---: |
| Total Revenues From Sales of Electricity | \$37,201,122 | \$3,871,641 | \$41,072,763 |
| Other Electric Revenues | 690,773 | - | 690,773 |
| Total Revenues | \$37,891,895 | \$3,871,641 | \$41,763,536 |
| Operating Expenses | \$40,437,742 | \$0 | \$40,437,742 |
| Other Expenses | 732,073 | - | 732,073 |
| Total Operating Cost of Service | \$41,169,815 | \$0 | \$41,169,815 |
| Margins or Increase in Net Assets | $(2,473,919)$ | 3,871,641 | 1,397,722 |
| Operating Revenue Requirements | \$38,695,895 | \$3,871,641 | \$42,567,536 |
| Total Non-Operating Revenues | \$804,000 | \$0 | \$804,000 |
| Total Revenue Requirements | \$38,695,895 | \$3,871,641 | \$42,567,536 |
| Less Interest Income | $(262,000)$ |  | $(262,000)$ |
| Less Contributions in Aid of Construction | $(542,000)$ | - | $(542,000)$ |
| Less Other Revenues | $(690,773)$ | - | $(690,773)$ |
| Less Wholesale Revenues | $(4,937,444)$ | - | $(4,937,444)$ |
| Revenue Requirements from Rates | \$32,263,678 | \$3,871,641 | \$36,135,319 |
| Revenue Increase (Decrease) | - |  | \$3,871,641 |
| Percent Change | - |  | 12.0\% |
| Debt Service Coverage Ratio (DSC) | 0.74 |  | 3.23 |
| TIER (Operating) | (3.72) |  | 1.94 |
| TIER (Total) | (2.55) |  | 3.11 |

## Notes

(1) Assumes retail revenue increase equal to $12 \%$ retail rate increase effective for a 12 month period.

## Section 3 COST-OF-SERVICE ANALYSIS

## Overview

A cost-of-service analysis for the District's TY 2010 revenue requirements was prepared based on the general framework developed in the January 1992 "NARUC Electric Utility Cost Allocation Manual" (NARUC Manual). The results of the cost-of-service analysis are summarized in this section. The detailed functionalization of revenue requirements is provided in Appendix B , the detailed classification is provided in Appendix C, and the detailed allocation of revenue requirements to customer classes is provided in Appendix D. Unit costs for the customer classes are also shown in Appendix D.

## Methodology

The process of developing a cost-of-service analysis for the District included the functionalization, classification and allocation of the District's TY 2010 revenue requirements in collaboration with District staff. For functionalization, the revenue requirements were organized by function including production, transmission and distribution. Administrative and general costs were primarily functionalized based on labor ratios and plant ratios. Each of the functionalized revenue requirement items was classified into demand, energy or customer components. The classified revenue requirements were then allocated to each customer class based on appropriate allocation factors developed for each class. Estimated revenues at existing rates for each rate class were compared to the cost-of-service results to determine the percentage rate change necessary for each rate class to achieve a cost-of-service level. Unit demand, energy and customer costs were also developed for use in the rate design process.

## Functionalization and Classification

Table 3-1 provides a summary of the functionalization and classification of the test year revenue requirements. Classifications of costs were generally performed using the methodologies set forth in the NARUC Manual. The detailed results of these analyses are provided in Appendices B and C.

Table 3-1
Okanogan County PUD
Summary of Functionalization and Classification of Revenue Requirements (Adjusted Test Year 2010)

| Description | Demand | Energy | Customer | Total |
| :--- | :--- | ---: | ---: | ---: |
| Production | $\$ 8,348,327$ | $\$ 17,641,904$ | $\$ 0$ | $\$ 25,990,231$ |
| Transmission | 444,823 | 0 | 0 | 444,823 |
| Distribution | $9,778,586$ | 0 | $4,859,123$ | $14,637,709$ |
| Total Cost of Service | $\$ 18,571,736$ | $\$ 17,641,904$ | $\$ 4,859,123$ | $\$ 41,072,763$ |

#### Abstract

Allocation After functionalized costs were classified into detailed cost components, an allocation was made of these costs to the District's customer classes. Three basic methods of allocating demand costs to classes of service discussed in the NARUC Manual are: (a) the peak responsibility (coincident peak) method, (b) the non-coincident peak method, and (c) the average and excess demand method. Under the peak responsibility method, system demand costs are allocated among classes in proportion to each class's load at the time of the system peak. Under the non-coincident peak method, system demand costs are allocated to classes in proportion to class maximum loads, regardless of time of occurrence. The average and excess demand method allocates costs to rate classes using a factor that combines the classes’ average demands and non-coincident peak demands. Variations of these methods are also commonly used. In this study, both the peak responsibility and the average and excess methods were used.

The main allocation factors developed for this analysis are described below:

| Allocation Factor | Description |
| :--- | :--- |
| $\mathbf{4}$ CP | The 4 coincident peak allocator represents each class's <br> contribution to the system peak during the 4 peak <br> months of the year, based on 2010 load research <br> analysis results. |
| $\mathbf{1 2}$ NCP | The 12 non-coincident peak allocator relates the peak <br> demand for each customer class, not necessarily <br> coincident with the system peak, to the sum of peak <br> demands for all classes during the each month of the <br> year, based on 2010 load research analysis results. |
| Average and Excess | The average and excess allocator combines the class's <br> average demands and non-coincident peak demands, <br> based on 2010 load research analysis results. |
| Energy | The energy allocator represents each class's share of <br> annual energy sold, excluding sales for resale. |

| Allocation Factor | Description |
| :--- | :--- |
| Customer Allocator | The customer allocator relates the number of customers <br> within each class to the total number of District <br> customers served. |
| Weighted Customer Allocators | The weighted customer allocators adjust the customer <br> allocator by the relative service level required for each <br> customer class. The three weighted customer allocators <br> are for the cost of meters, meter reading and customer <br> service. |
| Other Allocators | Other allocators were developed based on intermediate <br> results of the cost-of-service analysis. |

In the peak responsibility method, demand-related generation and transmission costs were allocated using the 4 CP allocator. In the average and excess method, these costs were allocated using the average and excess allocator, which combines the class's average demands and non-coincident peak demands. In both analyses, energy-related production costs were allocated on a per-kilowatt hour basis, demand-related distribution costs were allocated based on 12 NCP allocators, and customer-related costs were assigned to classes of service based on either the customer allocator or one of several weighted customer allocation factors. Line transformer and service drop costs were not allocated to the industrial class because they are served at a primary voltage service level.
The demand, energy and customer allocation factors used in this study are presented in Appendix D. The estimated cost of service for each of the District's main customer classes using both the peak responsibility method and the average and excess method is summarized in Table 3-2.

Table 3-2
Okanogan County PUD
Allocated Cost of Service by Customer Class (Adjusted Test Year 2010)

|  | Demand | Energy | Customer | Total |
| :--- | ---: | ---: | ---: | ---: |
| Peak Responsibility Method |  |  |  |  |
| Residential |  |  |  |  |
| Small General Service | $\$ 10,362,895$ | $\$ 8,037,260$ | $\$ 3,653,875$ | $\$ 22,054,030$ |
| Large General Service | 983,170 | 977,699 | 449,632 | $2,410,501$ |
| Industrial | $5,137,193$ | $4,947,533$ | 260,594 | $10,345,320$ |
| Irrigation | $1,118,446$ | $1,787,519$ | 4,547 | $2,910,512$ |
| Frost Control | 931,171 | $1,842,263$ | 369,214 | $3,142,649$ |
| Street Lights | 7,779 | 13,968 | 36,618 | 58,365 |
| Total | 31,082 | 35,661 | 84,643 | 151,386 |
|  | $\$ 18,571,736$ | $\$ 17,641,904$ | $\$ 4,859,123$ | $\$ 41,072,763$ |
| Average and Excess Method |  |  |  |  |
| Residential |  |  |  |  |
| Small General Service | $\$ 9,516,753$ | $\$ 8,037,260$ | $\$ 3,653,875$ | $\$ 21,207,888$ |
| Large General Service | 944,472 | 977,699 | 449,632 | $2,371,803$ |
| Industrial | $4,934,991$ | $4,947,533$ | 260,594 | $10,143,118$ |
| Irrigation | $1,105,772$ | $1,787,519$ | 4,547 | $2,897,839$ |
| Frost Control | $2,005,159$ | $1,842,263$ | 369,214 | $4,216,636$ |
| Street Lights | 34,615 | 13,968 | 36,618 | 85,201 |
| Total | 29,975 | 35,661 | 84,643 | 150,278 |

## Cost-of-Service Analysis Results

In Table 3-3, the cost-of-service results are compared to revenues from existing rates by customer class to determine whether rate changes are warranted. The revenues under existing rates are shown in the first column, and the second column provides the allocated costs of service for each customer class. The third column summarizes the amount that revenues from existing rates over or under recover the allocated cost of service. The last column shows the percentage that revenues from current rates would need to be reduced or increased if rates were to be adjusted to reflect cost-of-service levels for each class.

Table 3-3
Okanogan County PUD

## Summary of Cost-of-Service Results

(Adjusted Test Year 2010)

## Peak Responsibility Method

|  | Adjusted <br> Revenue Under <br> Existing Rates | Allocated <br> Cost <br> of Service (1) | Over (Under) <br> Cost <br> of Service | Percent Change <br> in Revenue |
| :--- | ---: | ---: | ---: | ---: |
| Customer Class |  |  |  |  |
|  | $\$ 15,078,884$ | $\$ 19,402,868$ | $(\$ 4,323,984)$ | $28.7 \%$ |
| Residential | $2,142,632$ | $2,120,730$ | 21,902 | $-1.0 \%$ |
| Small General Service | $9,789,952$ | $9,101,687$ | 688,264 | $-7.0 \%$ |
| Large General Service | $2,736,705$ | $2,560,633$ | 176,072 | $-6.4 \%$ |
| Industrial | $2,322,301$ | $2,764,864$ | $(442,564)$ | $19.1 \%$ |
| Irrigation | 68,344 | 51,349 | 16,995 | $-24.9 \%$ |
| Frost Control | 124,862 | 133,188 | $(8,326)$ | $6.7 \%$ |
| Street Lights | $\$ 32,263,678$ | $\$ 36,135,319$ | $(\$ 3,871,641)$ | $12.0 \%$ |
| Total |  |  |  |  |

Average and Excess Method

|  | Adjusted <br> Revenue Under <br> Existing Rates | Allocated <br> Cost <br> of Service (1) | Over (Under) <br> Cost <br> of Service | Percent Change <br> in Revenue |
| :--- | ---: | ---: | ---: | ---: |
| Customer Class |  |  |  |  |
|  | $\$ 15,078,884$ | $\$ 18,658,443$ | $(\$ 3,579,559)$ | $23.7 \%$ |
| Residential | $2,142,632$ | $2,086,684$ | 55,948 | $-2.6 \%$ |
| Small General Service | $9,789,952$ | $8,923,792$ | 866,160 | $-8.8 \%$ |
| Large General Service | $2,736,705$ | $2,549,483$ | 187,221 | $-6.8 \%$ |
| Industrial | $2,322,301$ | $3,709,746$ | $(1,387,445)$ | $59.7 \%$ |
| Irrigation | 68,344 | 74,959 | $(6,615)$ | $9.7 \%$ |
| Frost Control | 124,862 | 132,213 | $(7,352)$ | $5.9 \%$ |
| Street Lights | $\$ 32,263,678$ | $\$ 36,135,319$ | $(\$ 3,871,641)$ | $12.0 \%$ |
| Total |  |  |  |  |

## Notes

(1) Allocated cost of service includes allocation of wholesale revenues of $\$ 4.9$ million which are allocated to each customer class.

# Section 4 RATE DESIGN 

## Overview

The purpose of the rate design analysis was to identify an equitable rate structure for the District that will adequately recover the test year revenue requirements of the electric system while meeting the policy objectives of the utility. Additionally, the District elected to establish three sets of rates in this study to be effective July 1 of 2010, 2011 and 2012. ${ }^{3}$ Although the rate design modifications were in part based on the results of the cost-of-service analysis, other District policy factors were also considered in designing rates.

## Policy and Rate Design Guidelines

As described previously, the District's Board and management met several times to discuss various policy issues related to the study. The following paragraphs provide a summary of the basic policy and rate design guidelines that were developed in consultation with the District's Board and management and were used to develop the proposed rate adjustments.
Financial Integrity: Rates must preserve the District's financial integrity to allow for future capital investments and to meet the financial targets of the utility.
Cost-of-Service Based: Rates should generally reflect and be consistent with the cost of providing electric service to each customer class.

Rate Stability: Rate adjustments should, to the extent possible, promote stable rates for customers and avoid large changes in rates.
Simplification: The rate structure should be simple and easily understood by customers.

Equity: The rates should be equitable and, to the extent practicable, reflect the cost to provide service.
Reliability of Service: The District's rates should provide adequate funding to support the District being able to continue to provide reliable service to its customers.

Efficiency/Conservation: The rate structure should help encourage conservation and the efficient use of electricity.

[^2]
## Rate Development

The actual rates and rate structures for the District's various customer classes were modified to better meet the District's policies, including a rate design that provided more stable revenue recovery, more closely reflects cost-of-service levels, is simplified and easier to understand by the District's customers, and helps promote energy efficiency and conservation efforts. Specific changes in the District's rate design included the following:

- Separation of General Service Customer Class: A review of the General Service customer class revealed a wide range of usage levels within this single customer class. In addition, some customers within the General Service customer class have demand meters and are charged a demand charge. The installation of demand meters was determined based on an initial assessment as to whether the customer was expected to have demand greater than 50 kW . Based on the wide range of usage within this class and the differences between customers with demand meters compared to those without demand meters, it is proposed that the current General Service class be split into two separate customer classes:
> Small General Service: Customers with maximum demands less than 50 kW demand and no demand meters.
> Large General Service: Customers with maximum demands greater than 50 kW demand and demand meters installed.

Separation of the General Service class into two separate classes will allow the District to set its rates more closely to cost-of-service levels for each of these two distinct customer groups.

- Minimum Energy Charge: For the residential and small general service customer classes, a minimum energy charge is proposed. This charge would apply to each customer on a monthly basis, and would include a specific allowance for an amount of energy, which will increase over the 2010-2012 time period:

| Year | Minimum Energy <br> Charge | kWh <br> Included |
| :---: | :---: | :---: |
| 2010 | $\$ 15.00$ | 300 |
| 2011 | $\$ 20.00$ | 400 |
| 2012 | $\$ 25.00$ | 500 |

- Minimum Demand Charge: For the large general service and industrial customer classes, a minimum demand charge is proposed. This charge would automatically be included on each bill (similar to the minimum energy charge for other customer classes), and would cover the first 50 kW of demand for large general service customers and $1,000 \mathrm{~kW}$ of demand for industrial customers.
- Inverted Block Energy Rate for Residential Customer Class: For the Residential customer class, a change from a uniform energy rate to an inverted block energy rate is proposed. Under the proposed rate structure, residential customers with monthly energy usage greater than $2,000 \mathrm{kWh}$ will have their usage above that level charged at a higher rate. This rate structure is consistent with the conservation goals of the District, and will encourage the efficient use of electricity. An analysis of residential billing data suggests that this charge will affect the top 25 percent of residential customers in terms of monthly energy usage, with approximately 65 percent of customers having some usage in the higher rate block in at least one month of the year. It is estimated that only about 12 percent of customers will have usage in the higher rate block more than three months out of each year.
- Uniform Energy Charge for General Service Customer Classes: For the small and large general service classes, the energy charge is proposed to be changed from a declining block energy charge to a uniform energy charge. Under the proposed rate structure, all energy will be charged at the same rate. This change is consistent with the District's cost of service, simplification, and efficient use of electricity ratemaking principles.
- Decreased Industrial Customer Charge: The customer charge for the industrial customer class is proposed to decrease from $\$ 760$ to $\$ 75$. This reduction is consistent with the cost-of-service analysis levels for the industrial customer class. In addition, the introduction of the minimum demand charge for the industrial customer class will help maintain a level of monthly fixed cost recovery for these customers.
- Uniform Facilities Charges for Irrigation Customer Class: The facilities charges for the irrigation customer class are proposed to be adjusted from declining block charges to a uniform charge. In addition, this customer class's rates are proposed to be increased in line with cost-of-service levels. A uniform facilities charge will more accurately match the costs of serving these customers, and will promote correct sizing of irrigation services. In addition, increased facilities charges will reduce the seasonal energy charge consistent with the cost-of-service levels.
- Increased Facilities Charges for Frost Control Customer Class: The facilities charges for the frost control customer class are proposed to increase in line with cost-of-service levels. However, no overall revenue increase for the customer class is proposed. The proposed rate structure includes a decreasing energy charge that with the higher facilities charges will on average keep revenues at existing levels.

## Proposed Rates

Table 4-1 summarizes the existing and proposed rates for each customer class. The detailed rate design analysis is provided in Appendix E.

Table 4-1
Okanogan County PUD Existing and Proposed Rates

|  | TY 2010 | Proposed Rates |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Existing | Cost of | July | July | July |
| Rates | Service (1) | 2010 | 2011 | 2012 |

## Schedule No. 2 - Residential

Base Rates

| Basic Charge (\$/month) | $\$ 10.00$ | $\$ 17.89$ | $\$ 10.00$ | $\$ 10.00$ | $\$ 10.00$ |
| :--- | ---: | :---: | :---: | :---: | :---: |
| Energy Charge (\$/kWh) |  |  |  |  |  |
| $\quad<2,000 \mathrm{kWh}(2)$ | 0.04400 | 0.05085 | 0.04400 | 0.05000 | 0.05750 |
| $>2,000 \mathrm{kWh}$ | 0.04400 | 0.05085 | 0.05682 | 0.05770 | 0.06316 |
| Minimum Charge (\$/month) | 10.00 | 64.48 | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ |
| Minimum Energy Charge (\$/month) |  |  | 15.00 | 20.00 | 25.00 |
| kWh in Minimum Energy Charge |  |  | 300 | 400 | 500 |
| Percent Change in Revenue |  |  |  |  |  |

Notes
(1) Cost of Service rates include allocation of wholesale revenues.
(2) Charged on all energy in excess of kWh in minimum energy charge.

## Schedule No. 4 - Primary Industrial Service

Base Rates

| Basic Charge (\$/month) | $\$ 760.00$ | $\$ 94.74$ | $\$ 75.00$ | $\$ 75.00$ | $\$ 75.00$ |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Energy Charge (\$/kWh) | 0.03750 | 0.02193 | 0.03394 | 0.03506 | 0.03631 |
| Demand Charge (\$/billed kW/month) | 2.25 | 7.78 | 4.50 | 5.00 | 5.50 |
| Minimum Charge (\$/month) | 760.00 | $23,131.66$ | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ |
| Minimum Demand Charge (\$/month) | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ | $4,500.00$ | $5,000.00$ | $5,500.00$ |
| Power Factor Charge (2) | $97.0 \%$ |  | $97.0 \%$ | $97.0 \%$ | $97.0 \%$ |
| Percent Change in Revenue |  | $-6.8 \%$ | $5.0 \%$ | $5.0 \%$ | $5.0 \%$ |

Notes
(1) Cost of Service rates include allocation of wholesale revenues.
(2) For every percentage a customer's power factor is below 97 percent, the demand charge will increase 1.0 percent.

## Schedule No. 6 - Irrigation

Base Rates (2)
Facilities Charge

| $<75 \mathrm{HP}(\$ / \mathrm{HP}$ month $)$ | $\$ 1.55$ | $\$ 7.67$ | $\$ 2.00$ | $\$ 3.00$ | $\$ 4.00$ |
| ---: | ---: | :--- | ---: | ---: | ---: |
| $>75 \mathrm{HP}(\$ / \mathrm{HP}$ month $)$ | 1.00 | 7.67 | 2.00 | 3.00 | 4.00 |
| easonal Energy Charge | 0.02870 | 0.01974 | 0.02838 | 0.02733 | 0.02659 |
| ercent Change in Revenue |  | $59.7 \%$ | $9.5 \%$ | $9.5 \%$ | $9.5 \%$ |

Notes
(1) Cost of Service rates include allocation of wholesale revenues
(2) Rate schedule is based on continuous service for the irrigation season of April 1 through October 31.

|  | TY 2010 | Proposed Rates |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Existing | Cost of | July | July | July |
| Rates | Service (1) | 2010 | 2011 | 2012 |

Schedule No. 7 - Frost Control
Base Rates (2)

| Annual Facilities Charge (\$/horsepower) | $\$ 3.45$ | $\$ 5.97$ | $\$ 4.00$ | $\$ 4.25$ | $\$ 4.50$ |
| :--- | ---: | :--- | ---: | ---: | ---: |
| Energy Charge (\$/kWh) | 0.05300 | 0.00726 | 0.04020 | 0.03444 | 0.02874 |
| Percent Change in Revenue |  | $9.7 \%$ | $0.0 \%$ | $0.0 \%$ | $0.0 \%$ |

Notes
(1) Cost of Service rates include allocation of wholesale revenues.
(2) Customers served under this customer class are billed once annually in June.

The proposed rates reflect the policies and rate design direction provided by the District's staff and Board of Commissioners. Residential and Irrigation customer class rates are proposed to be increased on average 9.5 percent over current rates in each year from 2010 to 2012. Small General Service rates are proposed to be increased 5.0 percent on average from current rates, followed by lower rate increases in 2011 and 2012. Large General Service rates are proposed to increase on average at 2.0 percent each year. The increase is proposed to be less for the Large General Service relative to the Small General Service to reflect that the Large General Service currently is above cost-of-service levels. Industrial rates are proposed to increase on average 5.0 percent in each year from 2010 through 2012. No change in revenue is proposed for the Frost Control and Street Lighting classes, although the rate structure is proposed to be changed for the Frost Control customer class. Overall, the District's proposed rates are expected to result in an overall 6.5 percent revenue increase on an annualized basis from the revenues provided with current rates in 2010, or approximately a $\$ 2.1$ million increase over the District's TY 2010 revenues in 2010 and similar amounts in the following two years.

Table 4-2 summarizes the estimated revenues for TY 2010 under existing and proposed rates for each customer class compared to the allocated cost of service for each class. In addition, the estimated change in TY 2010 revenues as compared to revenues under existing rates is summarized. Similar revenue increases are projected to occur in both 2011 and 2012 under the proposed rates.

Note: For the purposes of this analysis, the monthly usage of customers billed on a bimonthly basis was estimated by dividing their bimonthly usage by two. Based on 2008 billing data
approximately $4 \%$ of general service customers were billed on a bimonthly basis.

Note: Rate 4 only serves three customers. Other usage levels are shown for reference. This analysis does not include the customer served under the "New Single Large Load" customer class. This analysis includes a monthly power factor penalty of a 1.0 percent increase in the demand charge for every percentage point a customer's power factor drops below 97 percent.

Note: Customers served under the A70 rate schedule (Frost Control) are billed once annually in June. This analysis shows the estimated annual bill. The two customers with annual kWh greater than 10,000 kWh were billed for $18,240 \mathrm{kWh}, 60.0 \mathrm{HP}$, and $11,520 \mathrm{kWh}, 500.0 \mathrm{HP}$ respectively. Average energy rates (cents/kWh) may be overstated for low kWh users (see lines 1-2) due to estimation of annual HP rating by energy level.

# Appendix F <br> P.U.D. No. 1 of Okanogan County, Resolution No. 1506, May 4, 2010 

## RESOLUTION NO. 1506

## A Resolution Revising the District's Electric Service Rate Schedules

WHEREAS, District Resolution No. 832 and subsequent amendments have set forth the General Policy Provisions and Electric Rate Schedules of the District; and

WHEREAS, the District has conducted an extensive analysis of its cost of service as outlined in its Cost of Service Study; and

WHEREAS, based on the results of the Cost of Service Study, the Board of Commissioners desires to adopts rates that more accurately reflect the cost of service for each individual rate class; and

WHEREAS, the District has completed a detailed analysis of its future financial requirements as outlined in its Equity Management Plan (EMP); and

WHEREAS, the District has determined that a series of rates increases are necessary to maintain stable rates for its customers, meet both short-term and long-term financial goals, and to maintain the District's strong financial condition; and

WHEREAS, the EMP indicates that the cost of purchased power is a significant driver in the cost of providing electricity to the District's consumers, and

WHEREAS, the EMP indicates that an annual rate increase of three percent (3\%) beginning in 2013 would provide financial stability to the District in the future.

NOW, THEREFORE, BE IT RESOLVED that the Board of Commissioners of Public Utility District No. 1 of Okanogan County hereby authorizes a series of three (3) annual rate adjustments representing six and a half percent (6.5\%) revenue increases each.

BE IT FURTHER RESOLVED that the Board of Commissioners hereby authorizes rates to automatically be adjusted to reflect any increase or decrease in the cost of power from contracted power sources within thirty (30) days of the District incurring such increase or decrease, unless suspended by a Resolution of the Board of Commissioners.

BE IT FURTHER RESOLVED that the Board of Commissioners hereby authorizes an annual retail revenue increase of three percent (3\%) beginning in 2013 and occurring every year thereafter, unless such annual increase is suspended by a resolution of the Board of Commissioners.

BE IT FURTHER RESOLVED that the Board of Commissioners hereby adopts and approves the rates and effective dates as set forth in the District's Service Schedules, attached hereto and made a part of this Resolution as follows:

Residential Service Schedule No. 2:
Effective for billings rendered on or after July $1^{\text {st }}$ with adjustments in the years 2010, 2011 and 2012.

Small General Service Schedule No. 3a:
Effective for billings rendered on or after July $1^{\text {st }}$ with adjustments in the years 2010, 2011 and 2012.

Large General Service Schedule No. Sb:
Effective for billings rendered on or after July $1^{\text {st }}$ with adjustments in the years 2010, 2011 and 2012.

Industrial Service Schedule No. 4:
Effective for billings rendered on or after July $1^{\text {st }}$ with adjustments in the years 2010, 2011 and 2012.

## New Large Single Load Service Schedule No. 5:

Rates for this service schedule will be negotiated and set by a power sales agreement, when necessary.

Irrigation Service Schedule No. 6:
Effective for billings rendered on or after January $1^{\text {st }}$ with adjustments in the years 2011, 2012 and 2013.

Frost Control Service Schedule No. 7:
Effective for billings rendered on or after July $1^{\text {st }}$ with adjustments in the years 2010, 2011 and 2012.

Street Lighting Service Schedule No. 8:
No adjustments at this time.
Area Lighting Service Schedule No. 10:
No adjustments at this time.

PASSED AND APPROVED this $4^{\text {th }}$ day of May, 2010.

## ATTEST:

Ernest J. Bolz, Vice President

Trish Butler, Secretary
APPROVED:

Michael D. Howe, Legal Counsel

## P.U.D. NO. 1 OF OKANOGAN COUNTY <br> SERVICE SCHEDULE NO. 2 <br> RESIDENTIAL SERVICE

Applicable: To each individual customer/family residing in a single family dwelling or multiple family building, and to a farm which processes only its own products. The single meter on a farm may serve buildings used only for the single farm. The maximum service provided under this schedule is 600 amperes.

The schedule is based on continuous use and minimums will be billed for twelve consecutive months.

Monthly Rates:

|  | July 1, 2010 | July 1, 2011 | July 1, 2012 |
| :---: | :---: | :---: | :---: |
| Basic Charge | \$10.00 | \$10.00 | \$10.00 |
| Energy Charge (note 1) |  |  |  |
| First $2,000 \mathrm{kWh}(\$ / \mathrm{kWh})$ | \$. 04400 | \$. 05000 | \$. 05750 |
| Over $2,000 \mathrm{kWh}(\$ / \mathrm{kWh})$ | \$. 05682 | \$.05770 | \$. 06316 |
| Minimum Energy Charge | \$15.00 | \$20.00 | \$25.00 |
| kWh in Minimum Energy Charge | 300 | 400 | 500 |

General Provisions: Service under this schedule is subject to the General Provisions in accordance with Resolution No. 832 of the District.

Effective Date: Effective for all energy usage, basic charges and minimums billed on or after the above referenced dates.

## Notes:

1) Charged on all energy in excess of the kWh in the minimum energy charge.

# P.U.D. NO. 1 OF OKANOGAN COUNTY 

## SERVICE SCHEDULE NO. 3a

SMALL GENERAL SERVICE

Applicable: Electrical service to commercial, governmental, industrial, or other services not eligible under other rate schedules where measured demand is less than 50 kW at all times.

The schedule is based on continuous use and minimums will be billed for twelve consecutive months.

## Monthly Rates:

| Basic Charge | $\$ 12.00$ | $\$ 12.00$ | $\$ 12.00$ |
| :--- | :--- | :--- | :--- |
| Energy Charge (note 1) <br> All Energy (\$/kWh) | $\$ .05499$ | $\$ .05730$ | $\$ .05855$ |
| Minimum Energy Charge | $\$ 15.00$ | $\$ 20.00$ | $\$ 25.00$ |
| kWh in Minimum Energy Charge | 300 | 400 | 500 |

Demand: If the connected load is determined to be equal to or greater than 50 kW then a rate schedule change may be necessary.

General Provisions: Service under this schedule is subject to the General Provisions in accordance with Resolution No. 832 of the District.

Effective Date: Effective for all energy usage, basic charges and minimums billed on or after the above referenced dates.

Notes:
1). Charged on all energy in excess of the kWh in the minimum energy charge.

## P.U.D. NO. 1 OF OKANOGAN COUNTY <br> SERVICE SCHEDULE NO. 3b

## LARGE GENERAL SERVICE

Applicable: Service to any one individual customer for which another specific rate schedule is not available with a connected load of 50 kW or greater.

The schedule is based on continuous use and minimums will be billed for twelve consecutive months.

## Monthly Rates:

|  | July 1,2010 | July 1.2011 |  | July 1, 2012 |
| :--- | :--- | :--- | :--- | :--- |
|  | Basic Charge | $\$ 12.00$ |  | $\$ 12.00$ |

Demand: At the option of the District, billing demand shall be as indicated by a demand meter, as determined by a test, or on the basis of connected load. The method of determining demand may be changed from one to another at any time.

Power Factor: The consumer agrees to maintain unity power factor as nearly as practicable. The demand charge, before adjustment for power factor, will be increased $1 \%$ more for each $1 \%$ by which the average power factor is less than .97 lagging. The threshold for power factor adjustment may change at any time the power factor requirements of the District's wholesale power suppliers change.

General Provisions: Service under this schedule is subject to the General Provisions in accordance with Resolution No. 832 of the District.

Effective Date: Effective for all energy usage, basic charges and minimums billed on or after the above referenced dates.

# P.U.D. NO. 1 OF OKANOGAN COUNTY 

## SERVICE SCHEDULE NO. 4

## INDUSTRIAL SERVICE

Service Character: Three phase, 60 cycle, primary distribution voltage available or approved by the District. Transformation and all distribution system inside the customer's plant to be supplied by the customer.

Applicable: For any load with measured monthly demand of at least $1,000 \mathrm{~kW}$ and not more than $10,000 \mathrm{~kW}$ average annual increase.

Monthly Rates:

|  | July 1, 2010 | July 1, 2011 | July 1,2012 |
| :---: | :---: | :---: | :---: |
| Basic Charge | \$75.00 | \$75.00 | \$75.00 |
| Energy Charge |  |  |  |
| All Energy ( $\$ / \mathrm{kWh}$ ) | \$. 03394 | \$. 03506 | \$. 03631 |
| Demand Charge (\$/all kW/month) | \$4.50 | \$5.00 | \$5.50 |
| Minimum Demand Charge | \$4,500.00 | \$5,000.00 | \$5,500.00 |
| kW in Minimum Demand Charge | 1,000 | 1,000 | 1,000 |

Demand: The billing demand shall be the maximum kW load used by the customer during the month for which the bill is being rendered, as indicated by the demand meter.

Power Factor: The consumer agrees to maintain unity power factor as nearly as practicable. The demand charge, before adjustment for power factor, will be increased $1 \%$ more for each $1 \%$ by which the average power factor is less than .97 lagging. The threshold for power factor adjustment may change at any time the power factor requirements of the District's wholesale power suppliers change.

General Provisions: Service under this schedule is subject to the General Provisions in accordance with Resolution No. 832 of the District.

Effective Date: Effective for all energy usage, basic charges and minimums billed on or after the above referenced dates.

# P.U.D. NO. 1 OF OKANOGAN COUNTY <br> <br> SERVICE SCHEDULE NO. 6 <br> <br> SERVICE SCHEDULE NO. 6 <br> <br> IRRIGATION SERVICE 

 <br> <br> IRRIGATION SERVICE}

Applicable: Electrical service for irrigation, drainage and incidental farm use. Schedule is based on continuous service for the irrigation season of April 1 through October 31.

Rates:

|  | $\underline{\text { Jan. 1,2011 }}$ | $\underline{\text { Jan. 1, 2012 }}$ |  | Jan. 1, 2013 |
| :--- | :---: | :---: | :---: | :---: |
| Facilities Charge (\$/HP/month) | $\$ 2.00$ | $\$ 3.00$ | $\$ 4.00$ |  |
| Seasonal Energy Charge <br> All Energy (\$/kWh) | $\$ .02838$ | $\$ .02733$ | $\$ .02659$ |  |

Billing: For installations 75 HP and above, meter will be read and billed monthly starting in May.
For installation under 75 HP , meter will be read at the end of the irrigation season. Bills from May to October may be estimated on the basis of the prior year's average kWh usage per HP of connected load, or, in the absence of prior history, based upon 275 kWh per HP of connected load. Adjustment of estimated usage to actual usage will be made with the final bill in November.

Final bills will become delinquent 30 days after the billing date. Delinquent bills will be subject to the District's standard collection procedures and fees. A deposit in an amount equal to the season Facilities charge shall be required for the following irrigation season on a delinquent account.

General Provisions: Service under this schedule is subject to the General Provisions in accordance with Resolution No. 832 of the District.

Effective Date: Effective for all energy usage, basic charges and minimums billed on or after the above referenced dates.

## P.U.D. NO. 1 OF OKANOGAN COUNTY

## SERVICE SCHEDULE NO. 7

## FROST CONTROL SERVICE

Applicable: Electrical service to wind machines or pumps used only for frost protection.

## Rates:

|  | $\underline{\text { July 1, 2010 }}$ | July 1,2011 | July 1, 2012 |
| :--- | :---: | :---: | :---: | :---: |
| Annual Facilities Charge (\$/HP) | $\$ 4.00$ | $\$ 4.25$ | $\$ 4.50$ |
| Energy Charge <br> All Energy $(\$ / k W h)$ | $\$ .04020$ | $\$ .03444$ | $\$ .02874$ |

Billing: Bills shall be rendered annually on approximately June 15 of each year. In the event the current year's billing is not paid in full by September 1, the account will be disconnected. Prior to reconnecting the service, the District will require payment in full of the delinquent billing and all associated late, disconnection, and reconnection charges. In addition, a security deposit equivalent to the following year's annual facilities charge will be required. A $1 \%$ per month service charge is assessed on balances that are over thirty (30) days in arrears.

Service: For service to be supplied under this schedule the customer must agree to and pay the following:

1) Prepay all District costs of initial service installation. Customer would pay the depreciated cost of any existing unused facilities.
2) All costs to replace the initial system due to damage, obsolescence, added load, depreciation, etc., must be paid before service will be allowed the following year. All such work must be performed by District crews.
3) All facilities required to serve customers under this rate schedule shall remain the property of the District.

Service Restrictions: Service to new wind machines will only be provided if adequate capacity is available in the existing backbone system. The Engineering Department must be contacted before new services are allowed. If requested by the customer, backbone system improvement costs can be included in item 1) above.

General Provisions: Service under this schedule is subject to the General Provisions in accordance with Resolution No. 832 of the District.

Effective Date: Effective for all energy usage, basic charges and minimums billed on or after the above referenced dates.

[^0]:    1 In addition to the six customer classes listed, the District has additional rate schedules for New Single Large Loads (service schedule number 5) and Area Lighting (service schedule number 10).

[^1]:    ${ }^{2}$ Irrigation customer class rates will be effective on January 1 of 2011, 2012 and 2013 to correspond with the growing season.

[^2]:    3 Irrigation customer class rates were set to be effective January 1 of 2011, 2012 and 2013.

[^3]:    Note: Represents data for July 2008 - June 2009, excluding the December - April because there is no usage during these months
